How to program Frequencies into memory on the AR-109

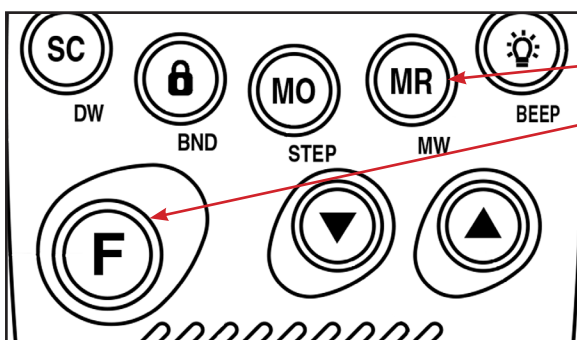

1) Make sure that Memory mode is OFF (pressing the **MR button** toggles between Frequency and Memory modes)

2) Select the desired frequency.

3) Press **MR button** and the

up/down arrow keys to select the desired memory number.

4) Press **F** then **MR** **2x** to store the frequency selected into the memory number you chose in step 3.
